TDD Workshop PBIs

Login App

Sprint 1

- As an administrator I would like to have a console application which would allow me to create an account with username and password.

  Acceptance Criteria:

1. Message should be displayed on Success/failure of user creation.

2. Username should be alphabet only.

3. Username length should be less than 11 and greater than 1

4. Password should contain only numbers.

Sprint 2

- As a user I would like to be able to login into the application with the created username and password.

Acceptance Criteria:

1. Message should be displayed "Login failed. Invalid username" in case of invalid username being used.

2. Message should be displayed "Login failed. Invalid password" in case of invalid password being used.

Sprint 3

- As an admin I would like the application to accept only strong password when creating a user.

Acceptance Criteria:

1. Minimum length of password is 8
2. Password should consist of at least 2 alphabet
3. Password should consist of at least 2 integer
